

## HYDROVAC SERVICES

### Service Applications

**Municipalities** - Safe, non-destructive excavation for water, sewer, and infrastructure maintenance.

**Utilities** - Precision daylighting and potholing to expose buried lines without damage or downtime.

**Service Centers** - Efficient cleanup, tank evacuation, and trenching support for commercial and industrial facilities.

**Energy** - Reliable excavation and material removal for oil & gas operations.

**Solar & Wind** - Safe trenching and utility exposure for renewable energy installations.

**Gas** - Controlled excavation around active gas lines to reduce risk and maintain compliance.

**And More** - Custom hydrovac solutions tailored to your site-specific needs.

### How Can We Help?

**Empty Oil/Water Separator Tanks** - Clean, contained removal of waste materials with environmentally responsible handling.

**Unclog a Line** - High-powered vacuum and water pressure to clear blockages safely and efficiently.

#### Trenching Over or Near Buried Utilities (Potholing)

Non-destructive excavation to safely locate and expose underground infrastructure.

**Footer Excavations (Potholing)** - Precision digging for foundations and structural support with minimal disruption.

**Bulk Material Removal & Tank Cleaning** - We safely remove and transport contents from:

- Storage Tanks
- Silos
- Railcars

Efficient material transfer with minimal mess and maximum site safety.
